Table 1: Predictive Performance of Individual and Combined Physiological Features. Patient-average results over the original five held-out folds ($n = 80$).

Input	AUROC	AP	Macro-F1	Top-1
Beta	0.723	0.518	0.585	0.625
Low Gamma	0.713	0.499	0.581	0.562
High Gamma	0.719	0.495	0.535	0.500
RMS	0.663	0.479	0.581	0.588
Line Length	0.748	0.549	**0.631**	**0.688**
Spectral Entropy	0.720	0.521	0.611	0.588
All Six (w/o PR)	0.722	0.520	0.482	0.613
All Six (+PR)	**0.757**	**0.554**	0.626	0.662

All rows use PR except the explicitly marked row. High Gamma is the available 80–125 Hz band. Bold denotes the best unrounded mean in each column. Confidence intervals are reported with Fig. B and in the supplementary tables.
